**Evacuation and Re-entry
Planning Course**

Unit 7

Course Conclusion

FEMA

Unit Objective

- **Develop an action plan for designing, developing, testing and implementing an evacuation and re-entry annex.**
- **Assess fulfillment of course objectives.**

FEMA

Evacuation Annex Components

Situation and Assumptions Section

- **Emergency conditions that could occur that would require evacuation**
- **Areas at risk for probable evacuation**
- **Population groups requiring special assistance during evacuation/re-entry**

FEMA

Evacuation Annex Components

Situation and Assumptions Section

- **Assumptions on which evacuation/re-entry planning is based**
- **Site-specific evacuation plans and/or maps (as attachments), such as those described in SARA Title III.**

FEMA

Evacuation Annex Components

Situation and Assumptions Section

- **Establish the parameters under which evacuation/re-entry planning takes place**
- **Focus on probable operational situations during the disaster**
- **Consider unknown issues that will develop**

FEMA

Evacuation Annex Components

Concept of Operations

Hazard Characteristics

- Magnitude
- Intensity
- Speed of onset
- Duration
- Impact on community

Scope of Evacuation

- How many people
- Time available
- Time and distance of travel to areas of safety

FEMA

Evacuation Annex Components

Concept of Operations

- **Scope of authority**
- **Provisions for people with disabilities and access and functional needs**
- **Means of maintaining evacuation communication**
- **Evacuation routes and options**

FEMA

Evacuation Annex Components

Concept of Operations

- **Transportation options available**
- **Assembly points**
- **Procedures to control flow of evacuation/re-entry**
- **Security of and access to evacuated area**

FEMA

Evacuation Annex Components

Concept of Operations

- **Re-entry policies and procedures**
- **Coordination with neighboring jurisdictions**

FEMA

Evacuation Annex Components

Organization and Assignment of Responsibilities

- **Specifically assigns evacuation/re-entry responsibilities**
- **Assignments are made to agencies and titles**

FEMA

Evacuation Annex Components

Administration and Logistics

Addresses the administrative and general support requirements for the evacuation/re-entry functions

FEMA

Evacuation Annex Components

Development and Maintenance

- **Identify who is responsible for coordinating revision of the Evacuation Annex, including keeping the attachments current.**
- **Make note of corrections and additions for your annex that should be addressed.**

FEMA

Evacuation Annex Components

Development and Maintenance

- **Develop a list of the planning tasks you are responsible for.**
- **Develop a list of planning tasks you are not responsible for, and the people who are.**

FEMA

Unit Objective

- **Develop an action plan for designing, developing, testing and implementing an evacuation and re-entry annex.**
- **Assess fulfillment of course objectives.**

FEMA

Course Review

- **Post Course Test consists of a series of multiple-choice questions**
- **Solve evacuation and re-entry problems based on knowledge gained in this course**
- **Be prepared to discuss the solutions.**
