

CONTINUITY EVALUATION TOOL: VERSION 7

The Continuity Evaluation Tool is designed to assess elements of continuity outlined in the annexes of Federal Continuity Directives 1 and 2 (FCDs 1 and 2). The purpose of the Continuity Evaluation Tool is to support the Readiness Reporting System (RRS) in evaluating any organization's continuity programs, plans and procedures. The Continuity Evaluation Tool serves as the off-line version of the RRS and includes all compliance and implementation questions found within the RRS. Exercise evaluators will use the Continuity Evaluation Tool in conjunction with the RRS to conduct evaluations during the annual Eagle Horizon and any other continuity-based exercises. Use of the RRS and Continuity Evaluation Tool to evaluate exercises over multiple years is encouraged to establish a baseline that demonstrates the extent to which organizations have implemented and improved their continuity plans and procedures.

Within the Continuity Evaluation Tool, there are 14 continuity elements to evaluate, which correspond with 14 of the 17 annexes found in FCD 1 and the essential functions portion of FCD 2. Annexes O-Q, which address Acronyms, Definitions, and Authorities and References, respectively, do not contain continuity requirements.

The Continuity Evaluation Tool further defines each element using continuity activities and supporting tasks. The supporting tasks are evaluated on a Yes/No scale with a numerical score of 0 through 6 being equivalent to a "No", and 7 through 10 being equivalent to a "Yes". This progressive scoring system is an integral part of the continuity RRS and allows an organization to demonstrate progress from one assessment to the next, even if the progress is not sufficient to move the rating from a "No" to a "Yes." Table A further defines these "Yes/No" scoring criteria. The overall assessment for each of these continuity elements will be based on the individual task Yes/No evaluations with that element. Any "No" rating for a critical task renders the entire element as "Red," indicating significant compliance or implementation concerns.

Questions within the Continuity Questionnaire are arranged within the continuity elements they support. The individual continuity questions that comprise each continuity element are then categorized within that element according to their significance to that element (i.e. - All questions are not equal in criticality). This categorization of questions (Category 1, Category 2 and Category 3 Questions) forms the basis of the final assessed value for the continuity elements.

- Category 1: Critical items that must be addressed immediately. These items are critically important for a given Continuity Element. If any of these questions are assessed as a "No" (progress score below a 7), there will be a severe degradation in that Continuity Element. If any of these items are degraded, the D/A's compliance for that element is severely degraded.
- Category 2: Items that are critical, but do not have the same sense of urgency as in Category 1. Individually, these items are not significant enough to render the D/A severely degraded for that element. However, if enough of these questions are answered "No," they would have a cumulative or synergistic effect that would severely degrade the element. In the first case, Category 2 questions could reach a cumulative threshold where they impact the assessment. In the second case, specific questions are linked to each other because they create a synergistic effect that would negatively impact the assessment. The RRS Continuity Questionnaire identifies these questions as Category 2 "Linked" questions. For a given continuity element, these Category 2 "Linked" questions are binned into groups based upon content. It is these groups of Category 2 "Linked" questions that, when assessed, could have a negative synergistic effect on the overall continuity element assessment. Category 2 "Linked" questions, when grouped, hold the same significance as a Category 1 question. As an example, when there are only two Continuity Questions in the group and both receive an assessment value in the "No" range on the progress rating scale, it will create a "Red" assessment value for the Continuity Element due to the negative synergistic effects. If both of the Continuity Questions in the group receive an assessment value in the "Yes" range, then there is positive synergistic effect on the Continuity Element. If one of the Continuity Questions in the group receives an assessment value in the "Yes" range and the other question receives a "No," then there is not enough negative synergistic effect to cause the entire Continuity Element assessment to be "Red."
- Category 3: Non-critical items. These question areas are not sufficient enough to lead to a critical deficiency or degraded compliance.

CONTINUITY EVALUATION TOOL: VERSION 7

The Continuity Evaluation Tool Task Rating Instructions:

- Answer all tasks associated with the respective continuity element, using the numerical score defined in Table A.
- Tasks rated as 7 or above are designated as a “Yes” by placing the appropriate numerical score in the “Yes” box.
- Tasks rated as 6 or below are designated as a “No” by placing the appropriate numerical score in the “No” box.
- Items that are not applicable to the organization’s continuity program in the respective continuity element should be annotated by placing an “X” in the “Not Applicable” box.
- Some tasks within the Continuity Evaluation Tool have been pre-identified and annotated as “Category 3” per RRS. The responses to these tasks do not impact the overall scoring for that particular element. These pre-identified tasks are shaded gray and still require a response.

The Continuity Evaluation Tool Element Rating Instructions:

- Identify any “No” responses for any “critical” tasks (denoted as “Category 1” per RRS), which are those tasks denoted with an asterisk (*), within the respective continuity element. The respective continuity element automatically receives a “Red” overall rating if the answer for any critical task is rated “No”.
- Any set of linked grouped questions must have $\geq 50\%$ of “Yes” responses. The respective continuity element automatically receives a “Red” overall rating if any linked group of questions within the element has $< 50\%$ of “Yes” responses. Linked groups of questions, based on RRS, are found in the scoring summary table at the end of each element. Linked Group 1 questions are shaded in Orange; Linked Group 2 questions are shaded in Green; Linked Group 3 questions are shaded in Purple; and Linked Group 4 questions are shaded in Yellow. Not all elements will have linked groups of questions.
- If all critical tasks within the respective continuity element are rated “Yes” and all groups of linked questions are $\geq 50\%$, add up all tasks rated as “Yes”, where each “Yes” rating counts as 1 item, regardless of the numerical designation, including all critical ones and all tasks within all activities for the respective continuity element.
- Determine the total number of applicable tasks, including all critical and cross-referenced questions (which are shaded in Blue in the scoring summary table at the end of element), within all activities within the respective continuity element. Exclude any tasks rated as “N/A” or with a category rating of “3” from the total number of applicable tasks for that respective element. For each cross-referenced question, enter the score determined within the element where the task was originally scored.
- Assign a Green, Yellow, or Red rating for the respective element based on the Yes/No answers given for all applicable tasks for all activities within that respective continuity element.
- The basis for a Green, Yellow, or Red rating is as follows:

CONTINUITY EVALUATION TOOL: VERSION 7

- **GREEN:** All critical tasks are “Yes” and at least 80% of all tasks within the respective continuity element are “Yes”, signifying that there are no significant deficiencies with the respective continuity element.
- **YELLOW:** All critical tasks are “Yes” and between 50 to 80% of all tasks within the respective continuity element are “Yes”, signifying that there are some compliance and/or implementation concerns that may hinder but not prevent continuity operations from occurring.
- **RED:** Any critical task is “No” or less than 50% of all tasks or linked group of questions within the respective continuity element are “Yes”, signifying that there are significant compliance and/or implementation concerns that will prevent continuity operations from occurring.
- To determine the percentage of tasks you answered as “Yes,” divide the number of tasks rated as “Yes” by the total number of applicable tasks to determine the percentage of tasks that are “Yes.”

Exercise Evaluation Guide

Capability Description: An effective continuity program is implemented through its related continuity plans and procedures and an effective continuity test, training, exercise, and operational capability to support those plans and procedures. An essential part of developing a comprehensive continuity plan is the establishment of planning and procedural objectives and requirements. Metrics shall be used to measure an agency’s ability to meet its continuity requirements. Continuity planning is an effort to document the existence of, and ensure the capability to continue agency essential functions during a wide range of potential emergencies.

Risk Management

Element Color Determination: _____

Exercise Evaluation Guide

Capability Description: The assessment and management of risk underlies the full spectrum of our national continuity program management, including decisions about when, where, and how to invest in resources that eliminate, control, or mitigate risks. In the face of multiple and diverse catastrophic possibilities, it is accepted that risk - a function of threats, vulnerabilities, and consequences - is a permanent condition. Therefore, a risk-based framework must be applied across all national continuity efforts in order to identify and assess potential hazards (including their downstream effects), determine what levels of relative risk are acceptable, and prioritize and allocate resources among all national continuity partners, both public and private, to ensure national continuity under all manner of incident conditions. Applying a disciplined approach to managing risk will help to achieve best progress, long term success, and overall effectiveness and efficiency.

Essential Functions

Element Color Determination: _____

Exercise Evaluation Guide

Capability Description: Essential functions are those organizational functions and activities that must be continued under any and all circumstances. These functions are derived from the organizations overall functions and missions and, when identified, should be prioritized to ensure the most important, critical functions are properly identified and emphasized, as appropriate. Essential functions are those functions that enable organizations to provide vital services, exercise civil authority, maintain the safety and well being of the general populace, and sustain the industrial/economic base in an emergency.

Element Color Determination: _____

Exercise Evaluation Guide

Capability Description: The success of continuity programs is dependent on the availability of robust and effective communications to provide Federal intra- and interagency connectivity. An agency’s ability to execute its essential functions at its HQ and at its alternate or other continuity facilities, as well as the ability of the agency’s senior leadership to collaborate, develop policy and recommendations, and act under all-hazards conditions, depends upon the availability of effective communications systems. These systems must support full connectivity, under all conditions, among key government leadership, internal elements, other agencies, critical customers, and the public.

Exercise Evaluation Guide

Capability Description: Each department and agency continuity program, plan, and procedures should account for identification and protection of those vital records and mission critical systems and databases, to include classified or sensitive data as applicable, that are necessary to perform essential functions and activities, and to reconstitute normal operations after the emergency ceases. Agencies should pre-position, and update on a regular basis, duplicate records and databases or back-up electronic media. The agency’s Vital Records Program must be reviewed periodically and updated accordingly.

Exercise Evaluation Guide

Capability Description: An effective Test, Training, and Exercise (TT&E) program is necessary to assist agencies to prepare and validate their organization’s continuity capabilities and program and support the Federal executive branch’s ability to perform PMEFs and MEFs during any emergency. The test, training, and exercising of continuity capabilities is essential to demonstrating, assessing, and improving an agency’s ability to execute its continuity program, plans, and procedures. Training familiarizes continuity personnel with their roles and responsibilities in support of the performance of an agency’s essential functions during a continuity event. Tests and exercises serve to assess, validate, or identify for subsequent correction, all components of continuity plans, policies, procedures, systems, and facilities used in response to a continuity event. Periodic testing also ensures that equipment and procedures are kept in a constant state of readiness.

Devolution of Control and Direction **Element Color Determination: _____**

Exercise Evaluation Guide

Capability Description: Devolution planning supports overall continuity planning and addresses catastrophes and other all-hazards emergencies that render an agency’s leadership and key staff unavailable to or incapable of performing its essential functions from either the agency’s primary or alternate facilities. Devolution planning also addresses notice and no notice events. A continuity plan’s devolution option should be developed so that it addresses how an agency will identify and transfer its essential functions and/or leadership authorities away from the primary facility or facilities, and to a location that offers a safe and secure environment in which essential functions can continue to be performed. The devolution option may be used when the agency’s alternate facility is not available or the option can be activated as a continuity measure.

Exercise Evaluation Guide

Capability Description: An agency must be prepared to implement executive decisions that are based upon a review of the emergency, and determine the best course of action based on agency’s readiness posture. The agency should integrate implementation procedures and criteria into its continuity plans. The agency’s continuity plan must address the four phases of (1) readiness and preparedness, (2) activation and relocation, (3) continuity operations, and (4) reconstitution. These actions are to ensure continuation of the agency’s essential functions before, during, and after an emergency or disaster and under all conditions.
