

Sponsored by  AshBritt

UNIVERSITY OF MIAMI
MILLER SCHOOL OF MEDICINE
GLOBAL INSTITUTE

This Basic Disaster Life Support Session is hosted by the University of Miami on behalf of the AshBritt Foundation partnership.

--

In 2024, the AshBritt Foundation/Perkins Family Emergency Management & Disaster Response Initiative was established at the *University of Miami's Global Institute for Community Health and Development.*

This partnership supports a multidisciplinary team of experts in disaster response focused on providing advanced trainings and humanitarian support in disaster impacted communities.

Humanitarian Disaster Response

We create sustainable models for disaster preparedness, response, recovery and resilience.

Education

We provide expertise for health care professionals, first responders, law enforcement and community agencies to improve best-practices.

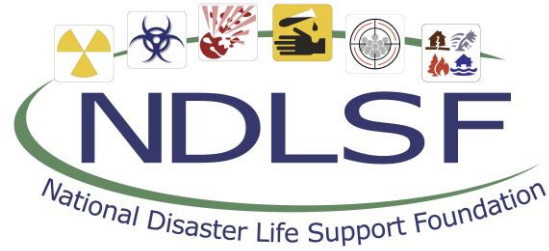

Research & Innovation

We're national and international leaders in pioneering, evidence-based research that provides global health and disaster response solutions.

Global Health

We're making humanitarian response sustainable, community-driven and just, with disaster response best practices that eliminate health disparities, build capacity and empower communities.

Basic Disaster Life Support™

Introduction

Course Learning Objectives

- Describe an all-hazards approach for use in disasters and public health emergencies
- Describe information sharing, resource access, communication, and reporting methods during disasters and public health emergencies
- Describe the purpose and importance of the incident management system in a disaster or public health emergency

Course Learning Objectives

- Describe surge capacity assets for the management and support of mass casualties in a disaster or public health emergency
- Describe access to health-related information and services to meet the medical and mental health needs of all affected by a disaster or public health emergency
- Describe public health interventions for all populations, and communities affected by a disaster or public health emergency

Course Learning Objectives

- Identify potential casualty populations in a disaster, including persons with acute injuries or illnesses; those with pre-existing disease, injuries, or disabilities; those with age-related vulnerabilities or other access needs; and family/caregiver support network
- Describe the deployment readiness components for health professionals in a disaster or public health emergency
- Describe an all-hazards standardized, scalable workforce protection approach for use in disasters

Course Learning Objectives

- Describe mass casualty field triage utilizing a standardized approach and uniform triage categories
- Describe the concepts and principles of mass fatality management in a disaster or public health emergency
- Describe the clinical assessment and management of injuries, illnesses, and mental health conditions manifested in a disaster.
- Describe moral, ethical, legal, and regulatory issues relevant to the health-related management of individuals affected by a disaster or public health emergency.
